

Mission, Vision, Obstacle, and Method

Our Mission

To inspire new solutions to our country's urgent economic problems by building a culture of respectful listening, passionate advocacy, and intelligent debate.

Our Vision

A world in which people are freed from material worry so each of us can contribute our unique gifts, and society can reach its highest potential.

The Obstacle

Partisan hostility and siloed thinking keep us from sparking the brilliant ideas we desperately need to create prosperity for all.

Our Method

We teach people from all walks of life to hear the voices of the great economic thinkers of the past echoed in today's arguments. Then, we line up the conservative, liberal, and radical perspectives on economic issues—side-by-side, in a completely unbiased way. By using role plays and other activities, participants become fluent in each point of view, combative debate becomes solution-focused conversation, and the foundation is set for innovative thinking to emerge.
